

PRESIDENT: Have you all recorded your presence? Record.

CLERK: Quorum present, Mr. President. Mr. President, I have a report from the Committee on Committees approving the appointment of certain Senators to the Committee for study of the flood damage. That will be inserted in the Legislative Journal in full. (See pages 1584 and 1585 of the Journal.)

PRESIDENT: Senator Warner, we're on 956 and the Clerk advises me that we have the same situation we did prior to the recess, that is we should adopt E & R's, advance it, then you can make your motion to return. Senator Warner.

SENATOR WARNER: Mr. President, I move the E & R amendments be adopted of LB 956.

PRESIDENT: All in favor say aye. Contrary say nay. They are adopted.

SENATOR WARNER: Mr. President, I move that LB 956 be advanced, readvanced, to E & R for Engrossment.

PRESIDENT: All in favor say aye. Contrary say nay. The bill is advanced. The Chair recognizes Senator Warner.

SENATOR WARNER: Mr. President, I move that LB 956 be returned to Select File for the specific amendment. The amendment is in the last sheet of the series of amendments that were passed out this morning. The first one strikes reference to a two thousand ton chiller for the East Campus at the University of Nebraska. The original Committee's recommendation limited the appropriation for a chiller that size. In further conversations it appeared with the University, appeared that that placing that limitation within the bill may not be the most desirable in that some replacement of existing units which may need to be done could be incorporated in the overall size and result in the lesser cost than what was originally proposed. The next amendment, number two, is similar....the same, relative to language contained in legislation introduced by Senator Rumery, it's one of the priority bills, or his priority bill, but what the amendment does is authorizes the Board of Regents specifically to dispose of property in this case. There is some property which either transmission lines end or a road is to be constructed and it would permit the University to hold those funds until such time that appropriate land to take the place of what they would be losing could be purchased at the open market to replace that agricultural research property. Amendment number three strikes some language relative to a revolving fund for some improvements to be done at the North Platte office building, or space that would have otherwise been rented out and it was decided that this approach was not appropriate at this point. Amendment four and five are merely corrective in identifying the right program number and program six and seven are the appropriate in our amendments to accompany the other amendments that are proposed. I move the bill be returned for those amendments.

PRESIDENT: Any further discussion? The question is shall the bill be returned for the specific amendment. Record your vote. Record.

CLERK: 26 ayes, 0 nays on the motion to return, Mr. President.
